

HEANIUM Bunchers, Stranders, Twisters, Twinners

Heanium buncher guides are manufactured as direct replacements for steel, carbide, and other ceramic guides. Heanium is designed to withstand the mechanical stresses of high-speed wire manufacturing. The following parts have special grooves and holes for retrofitting existing equipment.

Standard tolerances on all dimensions are ± 0.010 inch or $\pm 1.5\%$, whichever is greater. Diamond grind and/or hone to ± 0.0005 inches is available.
